ADOPTING FINDINGS RELATED TO THE CERTIFICATION OF A FINAL ENVIRONMENTAL IMPACT REPORT FOR THE PROPOSED TREASURE ISLAND/YERBA BUENA ISLAND PROJECT.

MOVED, that the San Francisco Planning Commission (hereinafter “Commission”) hereby CERTIFIES the Final Environmental Impact Report identified as Case No. 2007.0903E (hereinafter “Project”), based upon the following findings:

A. The Department determined that an Environmental Impact Report (hereinafter “EIR”) was required and provided public notice of that determination by publication in a newspaper of general circulation on January 26, 2008.

B. On July 12, 2010, the Department published the Draft Environmental Impact Report (hereinafter “DEIR”) and provided public notice in a newspaper of general circulation of www.sfplanning.org
the availability of the DEIR for public review and comment and of the date and time of the Planning Commission public hearing on the DEIR; this notice was mailed to the Department's list of persons requesting such notice.

C. Notices of availability of the DEIR and of the date and time of the public hearing were posted near the project site by Department staff on July 12, 2010.

D. On July 12, 2010, copies of the DEIR were mailed or otherwise delivered to a list of persons requesting it, to those noted on the distribution list in the DEIR, to adjacent property owners, and to government agencies, the latter both directly and through the State Clearinghouse.

E. Notice of Completion was filed with the State Secretary of Resources via the State Clearinghouse on July 12, 2010.

2. The Commission held a duly advertised public hearing on said DEIR on August 12, 2010, at which opportunity for public comment was given, and public comment was received on the DEIR. The period for acceptance of written comments ended on September 10, 2010.

3. The Department prepared responses to comments on environmental issues received at the public hearing and in writing during the 59-day public review period for the DEIR, prepared revisions to the text of the DEIR in response to comments received or based on additional information that became available during the public review period, and corrected errors in the DEIR. This material was presented in a Comments and Responses document, published on March 10, 2011, distributed to the Commission and all parties who commented on the DEIR, and made available to others upon request at the Department.

4. A Final Environmental Impact Report has been prepared by the Department, consisting of the Draft Environmental Impact Report, any consultations and comments received during the review process, any additional information that became available, and the Comments and Responses document all as required by law.

5. Following publication of the Environmental Impact Report, the Project's structure and financing were changed from a Redevelopment Plan and financing mechanism to an Area Plan to be included within the San Francisco General Plan and partial financing through an Infrastructure Financing District. These changes in turn result in the amount of affordable housing units to be reduced from approximately 2,400 units to 2,000 units. A memorandum describing these changes and other minor Project changes since publication of the EIR has been prepared and distributed by the Department which describes and evaluates these changes and presents minor amendments to the text of the EIR to reflect the changes. The memorandum demonstrates and concludes that the revisions to the Project would not substantially change the analysis and conclusions of the EIR. No new significant impacts or substantial increase in the severity of already identified significant impacts, no new mitigation measures, and no new alternatives result from these changes. Thus recirculation of the EIR for public review and comment is not required.
6. Project Environmental Impact Report files have been made available for review by the Commission and the public. These files are available for public review at the Department at 1650 Mission Street, and are part of the record before the Commission.

7. On April 21, 2011, the Commission reviewed and considered the Final Environmental Impact Report and hereby does find that the contents of said report and the procedures through which the Final Environmental Impact Report was prepared, publicized, and reviewed comply with the provisions of CEQA, the CEQA Guidelines, and Chapter 31 of the San Francisco Administrative Code.

8. The Planning Commission hereby does find that the Final Environmental Impact Report concerning File No. 2007.0903E reflects the independent judgment and analysis of the City and County of San Francisco, is adequate, accurate and objective, and that the Comments and Responses document contains no significant revisions to the DEIR, and hereby does CERTIFY THE COMPLETION of said Final Environmental Impact Report in compliance with CEQA and the CEQA Guidelines.

9. The Commission, in certifying the completion of said Final Environmental Impact Report, hereby does find that the project described in the Environmental Impact Report:

   A. Will result in the following significant and unavoidable project-specific environmental impacts:

   1) Alteration of scenic vistas of San Francisco and San Francisco Bay from public vantage points along the eastern shoreline of San Francisco, Telegraph Hill, the East Bay shoreline, and from the Bay Bridge east span.

   2) Impairment of the significance of an historical resource by demolition of the Damage Control Trainer.

   3) Construction impacts on the transportation and circulation network, including increased delay and congestion on the Bay Bridge near the ramps during the peak periods, and disruption to transit, pedestrian, bicycle, and vehicular traffic on the Islands due to roadway closures.

   4) Significant contribution to existing LOS E operating conditions during the weekday PM peak hour and during the Saturday peak hour at the eastbound off-ramp on the west side of Yerba Buena Island.

   5) Under conditions without the TI/YBI Ramps Project, traffic impacts at the two westbound on-ramps.

   6) Under conditions with the Ramps Project, traffic impacts during the AM and PM peak hours at the ramp meter at the westbound on-ramp on the east side of Yerba Buena Island.
7) Queuing at the Bay Bridge toll plaza during the weekday AM peak hour, with and without the TI/YBI Ramps Project.

8) Queuing on San Francisco streets approaching Bay Bridge during the weekday PM peak hour with and without the TI/YBI Ramps Project.

9) Traffic impact at the following nine intersections:
   - Intersection of First/Market;
   - Intersection of First/Mission;
   - Intersection of First/Folsom;
   - Intersection of First/Harrison/I-80 Eastbound On-Ramp;
   - Intersection of Bryant/Fifth/I-80 Eastbound On-Ramp; and
   - Intersection of Fifth/Harrison/I-80 Westbound Off-Ramp
   - Intersection of Folsom/Essex;
   - Intersection of Bryant/Sterling; and
   - Intersection of Second/Folsom.

10) Exceedance of the available transit capacity of Muni's 108-Treasure Island bus line serving the Islands during the AM, PM and Saturday peak hours.

11) AC Transit operations on Hillcrest Road between Treasure Island and the eastbound on-ramp to the Bay Bridge without the Ramps Project.

12) AC Transit operations on Treasure Island Road and Hillcrest Road between Treasure Island and the eastbound on-ramp to the Bay Bridge with the Ramps Project.

13) Traffic congestion in downtown San Francisco, which would increase travel time and would impact operations of the following three bus lines:
   - Muni 27-Bryant;
   - Muni 30X-Marina Express; and
   - Muni 47-Van Ness bus line.

14) Exceedance of the capacity utilization standard on Muni's 108-Treasure Island bus line serving the Islands from a shift from auto to transit modes, resulting from parking
shortfall on the Islands and leading to an increase in transit travel demand during the
peak hours.

15) Construction noise levels above existing ambient conditions.

16) Exposure of persons and structures to excessive ground-borne vibration or ground-borne
noise levels during construction from on-shore pile “impact activities,” such as pile
driving and deep dynamic compaction, and vibro-compaction.

17) Increase in ambient noise levels in the project vicinity above existing ambient noise levels
from project-related traffic and ferry noise.

18) Violation of air quality standards.

19) Exposure of sensitive receptors to substantial levels of toxic air contaminants.

20) Exposure of sensitive receptors to substantial levels of PM2.5.

21) Violation of air quality standards during project operations.

22) Exposure of sensitive receptors to substantial pollutant concentrations.

23) Potential conflict with adopted plans related to air quality.

24) Temporary wind hazard impacts during phased construction.

25) Potential exposure of publicly accessible locations within the Project Site to wind hazards

26) Potential adverse impacts on movement of rafting waterfowl from ferry operations.

B. Will contribute considerably to the following cumulative environmental impacts:

1) Potential cumulative construction-related traffic impacts in the project vicinity.

2) Cumulative traffic impacts at the eastbound off-ramp on the west side of Yerba Buena
Island.

3) Under conditions without the Ramps Project, cumulative traffic impacts at the two
westbound on-ramps.

4) Under conditions with the Ramps Project, cumulative traffic impacts during the AM and
PM peak hours at the ramp meter at the westbound on-ramp on the east side of Yerba Buena
Island.

5) Cumulative queuing impacts at the Bay Bridge toll plaza during the AM and PM peak
hours.
6) Cumulative queuing impacts on San Francisco streets approaching the Bay Bridge during the weekday AM and PM and Saturday peak hours.

7) Traffic impact at the following nine intersections:
   - Intersection of First/Market;
   - Intersection of First/Mission;
   - Intersection of First/Folsom;
   - Intersection of First/Harrison/I-80 Eastbound On-Ramp;
   - Intersection of Bryant/Fifth/I-80 Eastbound On-Ramp;
   - Intersection of Fifth/Harrison/I-80 Westbound Off-Ramp
   - Intersection of Folsom/Essex;
   - Intersection of Bryant/Sterling; and
   - Intersection of Second/Folsom.

8) Cumulative traffic congestion in downtown San Francisco, which would increase travel time and would impact operations of the following four bus lines:
   - Muni 27-Bryant bus line;
   - Muni 30X-Marina Express bus line;
   - Muni 47-Van Ness bus line; and
   - Muni 10-Townsend bus line.

9) Cumulative construction noise impacts from other cumulative development in the area, including the Clipper Cove Marina and the Yerba Buena Island Ramps Improvement Project, which could have construction activities that occur simultaneously with those of the Project.

10) Increases in traffic from the project in combination with other development would result in cumulative traffic noise impacts.

11) Cumulative air quality impacts.

11) The Project, when combined with other cumulative projects, could result in exposure of publicly accessible locations within the Project Site to wind hazards.

12) Potential cumulative impacts on rafting waterfowl.
I hereby certify that the foregoing Motion was ADOPTED by the Planning Commission at its regular meeting of April 21, 2011.

AYES: Commissioners Antonini, Borden, Fong, Miguel
NOES: Commissioners Olague, Moore, Sugaya
ABSENT: None
ADOPTED: April 21, 2011

Linda Avery
Commission Secretary
