Treasure Island Community Development (TICD) will switch all traffic lanes on the Causeway from the current eastern half of the Causeway to western half of the causeway on Monday, June 15, 2020. All other traffic lanes on Yerba Buena Island and Treasure Island will not be affected by this traffic switch.

In preparation for this traffic switch, TICD will be paving a temporary roadway on the western half of the Causeway in the next two weeks. Over the last 8 months, the western half of the Causeway has been reconstructed to improve the resiliency of the Causeway in seismic events.

The Treasure Island community can expect the following between 7:00 AM and 4:00 PM on Monday, June 15, 2020:

- Vehicles travelling to Treasure Island via Treasure Island Road or Macalla Road will be directed by flaggers and signage to the western half of the Causeway. At the bottom of the Causeway vehicles will be able to turn onto the Clipper Cove Detour or enter the Building One parking lot as they currently do.

- Vehicles leaving Treasure Island will be directed by flaggers and signage from Clipper Cove Detour to the outbound lane on the western half of the Causeway.

- The first inbound MUNI 25 bus stop at the bottom of the eastern half of the Causeway will be temporarily closed until July 05, 2020 when the new inbound and outbound bus stops at Building 1 will be re-established.

- The current pedestrian pathway on the eastern side of the Causeway will be closed. It will remain closed until March 2021.

- Contractors will install striping, barricades, and additional signage to close the eastern side of the causeway and facilitate the detour of traffic onto the western half the causeway.

The Treasure Island community can expect the following on Tuesday, June 16, 2020:

- The current crosswalk at Clipper Cove Detour from the Building 1 Market/Marina Parking lot to the Causeway will remain unaffected by this traffic switch.

- Access to Quarters 10 parking lot will be limited to emergency vehicles.

- No other roadways on YBI or TI will be affected by this work.

TICD Construction Hotline (888) 469-0797

Please call the TICD Construction Hotline with any questions or concerns related to the above work or to other construction activities associated with the TI/YBI redevelopment project.
